

**EXCLUSIVE ACOIN SESSION IN 74<sup>th</sup> AIOC 2016, Kolkata**  
**Saturday 27<sup>th</sup> February 2016, 2.00 to 3.25 pm**  
**Hall-M, Milan Mela Complex, Kolkata**

**Theme of the Session:**

**Community Eye Health and Advanced Technology: A blending is the need of time.**

Advanced today is obsolete tomorrow. Time selects and decides the existence and continuation of something new. Only those items which are useful and beneficial to the community ultimately survive the acid test of time and continue to serve the humanity.

Service to the community as a whole need to utilize the facilities of newer policies and equipments and a blending is necessary for the development of science and services. Let's understand its impact in community ophthalmology.

**Conduction policy:**

**Time limit for the speakers is 3 minutes using 4 slides.**
